**\$60 NEVER
LOOKED
SO GOOD**

Think \$60 a night for a full hook-up RV site is outrageous? Think again!

As of July 19 in Carson City, even Motel 6 is checking in at a jaw-dropping \$178, Super 8 is cruising at \$160, and the Holiday Inn Express? A cool \$321 - and that's with only two rooms left!

Wait a minute... \$60 for your own space, your own bed, and your own bathroom suddenly sounds like a screaming deal. RVers, rejoice: you're not just camping - you're winning at the travel game.

What did one ocean say to
the other ocean?

Nothing.....

They just
WAVED

ORCAS LIFE

My second life began on
June 6th, 1992, on Orcas Island.

This island, rugged - serene - full of soul, is home to world-famous skiers, boat builders, authors, astronauts, movie producers, and business moguls. These are people who could live anywhere in the world. And they choose here - Orcas.

Sometimes, I wonder:

Do they take this amazing place for granted, the way I sometimes catch myself doing?

I want to spend more time truly appreciating the beautiful life we call Orcas.

I feel deeply blessed to live here.

Do you?
